Having supply issues getting hydraulic cushion units in a timely manner? Yard plugged up with cars waiting on long lead delivery of hydraulic cushion units?

Strato has the solution...

Selective Cushioning Draft System

- In stock and ready to ship within 24 hours of order receipt
- Direct fit into AAR EOC-7, EOC-8, EOC-9, & EOC-10 pockets*
- Easily adaptable for E-Type & F-Type systems
- AAR Conditionally Approved

Unmatched performance for your railcar in a lower life cycle cost, non-hydraulic cushion unit design

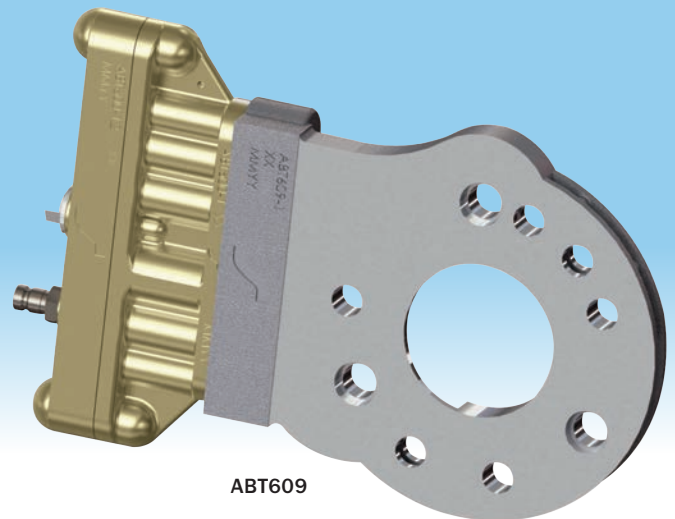

*For other AAR pockets, please contact Strato at 1-800-792-0500 for best retrofit option and part numbers

NEW

4-Port Receiver & Access Plate Assemblies

For installation between control valve pipe brackets without a built-in receiver mounting pad and service portion. Used with an automated single car test device to perform single car air brake testing.

- Available in 5 configurations.
- Receiver includes QD4 quick disconnect pressure tap.
- Ready to meet the AAR Mandate.

Reconditioned **COUPLERS & YOKES**

We now provide reconditioned couplers and yokes! In December 2023, we successfully partnered with Greenbrier Rail Services to acquire their Peoria, IL location. Working closely with Greenbrier, we ensured the retention of all the highly skilled employees at the location and are thrilled to have them join the Strato family!

Strato looks forward to filling all of your reconditioning needs in the future with outright sales and repair and return options available now. We also stock many new and reconditioned freight car repair parts and are looking to form new partnerships in the freight car industry. We are also actively seeking to acquire additional core couplers and yokes.

Any inquiries, please contact
Rocky Loessin (rloessin@stratoinc.com) or
Rosa Huff (rhuff@stratoinc.com)
